Schedule 13 - Significant Accounting Policies

1. Basis of Accounting

The financial statements have been prepared and presented under the historical cost convention on the accrual basis of accounting and in accordance with provisions of the Companies Act, 1956, and the accounting principles generally accepted in India and comply with accounting standards ('AS') prescribed in the Companies (Accounting Standards) Rules, 2006, issued by the Central Government, in consultation with the National Advisory Committee on Accounting Standards, to the extent applicable.

The accumulated losses of the Company as at March 31, 2009 have resulted in erosion of Company's net worth. At the year-end, the Company's current assets exceeded its current liabilities

by Rs.4,324,775 (2007-08: Rs.6,291,391) and its total liabilities exceeded its current assets by Rs.63,956,525 (2007-08: Rs.67,045,757). These accounts have been prepared on a going concern basis as the Company has received a letter of financial support from Wimco Limited (Holding Company).

2. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) in India requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. Fixed Assets / Amortisation / Impairment / Depreciation

Fixed Assets are stated at cost of acquisition less accumulated depreciation and impairment loss. Cost includes all expenses attributable to the acquisition and development of the assets.

Depreciation is computed on a straight-line basis at the following annual rates:

Nature of Assets	Rates %
Plant, machinery	4.75 to 10.34
Furniture and fittings	6.33
Vehicles	7.07 to 11.31

Building and civil works on leasehold land are charged on straight-line basis over the period of lease.

Assets individually costing Rs 5,000 or less are fully depreciated in the year of acquisition.

Leasehold Land is carried at cost less accumulated amortisation and impairment loss, if any. The lease agreement is effective upto 2031. Accordingly, expenditure incurred on leasehold land is amortised on a straight-line basis over the remaining period of the lease.

In accordance with AS 28, where there is an indication of impairment of the Company's assets, the carrying amounts of the Company's assets are reviewed at each balance sheet date to determine whether there is any impairment. The recoverable amount of the asset (or where applicable that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. An impairment loss is recognized whenever the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount. Impairment loss is recognized in the profit and loss account or against revaluation surplus, where applicable.

4. Inventories

- (i) In valuing poplar trees included under semi finished products, no adjustment is made to the total cost of trees on account of undeveloped / diseased trees, being normal loss during the period of maturity of plantation (based on a technical estimate) except that realization / insurance claim for such trees is reduced from the total cost. Every year, plantation cost already incurred is compared with net realizable value which is determined on the basis of estimated selling price less estimated cost likely to be incurred in future for bringing the plantation to maturity and the cost necessarily to be incurred in order to make sale.

Cost includes all direct and indirect expenses in respect of the poplar plantation.

Further, 75% of net standard realizable value of intercropping, waste, etc is reduced from the above cost because entire farm cost is first added to the cost of plantation.

- (ii) Agriculture produce/standing crops and plants are valued at 75% of their net realizable value.

5. Revenue recognition

Revenue from sale of goods is recognized on transfer of all significant risks and rewards of ownership to the buyer.

6. Contingencies and Provisions

A provision is created where there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation.

A contingent liability is disclosed when there is a possible or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible or a present obligation and the likelihood of outflow of resources is remote, no provision or disclosure is made.

7. Taxation

Income-tax expense comprises current tax, fringe benefits tax and deferred tax charge or credit. Current tax and fringe benefits tax is determined in accordance with the Income Tax Act 1961. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realised. As the Company is engaged in growing and selling agricultural produce, such income is exempt from income tax. Accordingly, there are no deferred tax assets/liabilities arising therefrom.

8. Earnings per share ('EPS')

The basic earnings per share ('EPS') is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the reporting period. Diluted EPS is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity and equivalent dilutive equity shares outstanding during the year, except where the results would be anti-dilutive.
